
SCS-104 Receiver Line Card**January 2014**

Version 102 Software Update

SCS-104 Version 102 (1/21/14) software is now available for download on the DMP Dealer Direct Website at <http://dmp.com/dealer>.

Effective January 29, 2014, all SCS-104 Receiver Line Cards will be manufactured with Version 102 (1/21/14) software. Version 102 (1/21/14) software will begin shipping as current inventory of SCS-104 Receiver Line Cards are depleted approximately mid-March.

Feature**256-bit AES Encryption**

The SCS-104 Receiver Line Card now supports the 256-bit AES encryption option for XR550E Control Panels using Version 104 or higher software. The SCS-104 supports both the new 256-bit option and 128-bit to maintain compatibility with existing control panels. Either 128-bit or 256-bit encryption can be enabled in panel programming for NET or CELL communication paths. Once enabled in the panel, the SCS-104 automatically communicates with that panel using the appropriate encryption.

Obtaining the New Software

SCS-104 software updates are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.

The SCS-104 can be updated using Remote Link Version 1.61 or higher and a Model 399 Programming Cable. See the SCS-104 Installation Sheet (LT-1207) for more information.
