TECHNICAL UPDATE

Remote Link and System Link
March 2013

Version 1.67 Software Update

Effective March 25, 2013, all Remote Link and System Link software is being manufactured as Version 1.67 (3/22/13). This version is an update from the Version 1.66 (10/03/12) previously shipped and contains new features and updated operation. If your current Remote Link or System Link software is previous to Version 1.46, update to Version 1.59 before updating to 1.67 (3/22/13).

Important Information: To provide better scalability for growth, SecureCom Wireless has upgraded servers used to provide dealers remote programming of panels over a cellular connection. The SecureCom Wireless server upgrades were completed in November 2012. Older versions of Remote Link prior to version **1.59 (6/24/11)** no longer have the ability to remote program through a panel's cellular connection. If using an older Remote Link version and your company remote programs through a panel's cellular connection, a Remote Link update is required. There is no requirement to update for remote programming if using Remote Link Version 1.59 (6/24/11) or higher.

Features

XR150/XR350/XR550 Series Control Panels

Remote Link Version 1.67 now supports the XR150/XR350/XR550 Series control panels.

Weather Information

A new option has been added to System Options programming that allows XR100/XR500 Series panels using Version 212 software with cellular or network connections to retrieve local weather data.

Weather Zip Code (XR100/XR500 V212 or higher)
This option allows local U.S.A. weather updates to display on the keypad. Enter the zip code of the user at this prompt. When no number is entered weather conditions are not displayed. Default is 0 (zero).

Obtaining the New Software

Remote Link and System Link Version 1.67 (3/22/13) updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
