FEATURE UPDATE

780 Keypad Demonstrator Module
February 2013

Version 103 Software Update

Effective February 21, 2013, all 780 Keypad Demonstrator Modules will be manufactured with updated Version 103 (2/13/13) software.

Features

7800 Series Graphic Keypad Compatibility

The 780 Keypad Demonstrator Module is now compatible with the new 7800 Series Graphic Keypads. A connected Graphic Keypad can demonstrate the new graphical interface for arming and weather information as well as standard keypad functions.

Weather Information

A new option has been added to 780 programming to allow keypads connected to the 780 Keypad Demonstrator Module to display simulated weather information in the status list.

```
ENTER WEATHER
ZIP CODE:
```

Enter Weather Zip Code

Enter any 5 digit ZIP Code. When a ZIP code is entered the keypad status list or home screen will display simulated temperatures and weather conditions. To disable this feature, select any top row Select key and press CMD to clear the zip code display. The default is blank.

Updated Operation

User Codes

The User Code function in the User Menu has been updated to simulate adding a user code to current XR100/XR500 Series control panels.

Instant Arm

The 780 no longer displays "INSTNT" when arming Away in a Home/Sleep/Away system or arming All in an All/Perimeter system. This reflects current panel operation.

Obtaining the New Software

To update to the latest software, return the 780 Keypad Demonstrator Module to DMP and simply indicate "Update to Latest Version Software" on the RMA tag. If you need RMA tags, contact DMP Customer Service at 1-800-641-4282.
