

## Virtual Keypad App

June 2012

### Version 3.0.0 Software Update

Effective July 2, 2012, the Virtual Keypad™ App for Android systems has been updated to support video camera operation.

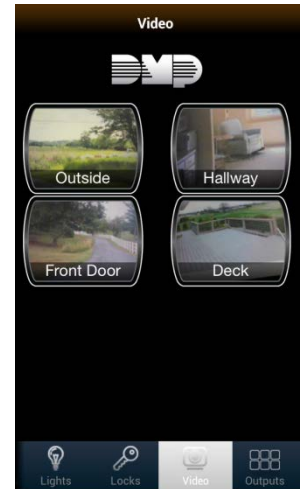

### Features

#### SecureCom Wireless Video Support

The Virtual Keypad App for Android now allows cameras to be added to your customers' Virtual Keypad App. Video capability gives customers the ability to look in on their premises via Android devices such as a smart phone or tablet. Simply install cameras and activate through SecureCom Wireless at [vk.securecomwireless.com](http://vk.securecomwireless.com).

- Incorporate up to six video cameras
- Provides new RMR opportunities
- Email video clips based on motion detection

Choose from the following cameras and accessories available to order from DMP:

#### Camera Options

The Model V-RC8021 Wireless IP Camera is an easy-to-install wired/wireless IP camera in a compact, portable design that can be discretely installed in almost any interior location. It provides excellent video quality with VGA resolution. Refer to the V-RC8021 installation guide (LT-1248) for additional information.

The Model V-OC810 Outdoor IP Camera provides a weather, water, and dust-proof IP camera designed for outdoor video surveillance. Install as a wired or wireless IP camera. Automatic day/night switching, with infrared illumination to over 30 feet, capturing images even in total darkness. Built in PIR for motion detection can be used to initiate video clip recordings. Refer to the V-OC810 installation guide (LT-1247) for additional information.

The Model V-RC8221 Wireless HD IP Camera is a high definition camera and can be installed as wired or wireless. Built in PIR for motion detection can be used to initiate video clip recordings. Includes infrared capability that enables recording even in total darkness. Refer to the V-RC8221 installation guide (LT-1249) for additional information.

#### Camera Accessories

The Model V-IP1006RR Wireless Access Point provides secure, wireless camera networking between the camera and the home router. Allows easy installation of wireless cameras on the existing network without needing to configure the customer's router.

The Model V-DCEXT-9 is a 9' DC power supply extension for cameras that are not located near an existing outlet.

### Obtaining the New Software

Virtual Keypad App updates are available for download free of charge from Google Play (Android Market).
