Virtual Keypad App
January 2012

Version 2.0 Software

Effective January 2012, the Virtual Keypad™ app for the Apple iPAD/iPhone and Android systems has been updated to Version 2.0 and contains new features.

Features

Z-Wave Devices

The Virtual Keypad™ now supports Z-Wave devices when the new 738Z Z-Wave Interface Module is used with the XT30/XT50 Series™ Panel or XTL™ Wireless Security System.   See the XT30/XT50™ Series and XTL™ Technical Update (TU-0618) for additional information.

Features

- XT30/XT50™ Series and XTL™ panels control up to 32 Z-Wave devices
- Wireless, low-energy mesh radio technology easily travels through walls, floors, and cabinets
- Turn lights ON/OFF and adjust brightness
- Turn heating/cooling systems from Heat, Cool, Auto and Off
- Remotely lock/unlock doors and check lock status
- For use in residential installations as well as smaller commercial applications

Obtaining the New Software

Virtual Keypad app updates are available for download free of charge from the Apple iPAD/iPhone App Store or the Android Market.
