1100D Wireless Receiver Feature Update
August 2006

Version 102 Software Update

Effective August 2006, all 1100D Wireless Receivers are being manufactured with Version 102 (8/16/06) software. This version is an update from the Version 101 (1/5/06) software previously shipped and contains new features.

Features

Household Fire and Commercial Hold-up UL Listed

The 1100D software now supports the requirements for the Residential Fire and Commercial Hold-up UL Listings. This allows UL Listed operation with the DMP Model 1161 and 1162 Wireless Smoke Detectors for Residential Fire. Also, the 1100D now allows UL Listed operation with the model 1142 Two-Button Panic for Hold-up applications.

To support the additional UL listings, the following two requirements should also be met:

- XRSuper6, XR20 and XR40 Command Processor panels must use firmware version 301 or higher

- SCS-1R Central Station Receiver must use firmware version 902 (6/28/06) or higher
