

FEATURE UPDATE | JUNE 2018

Version 2.7 Update

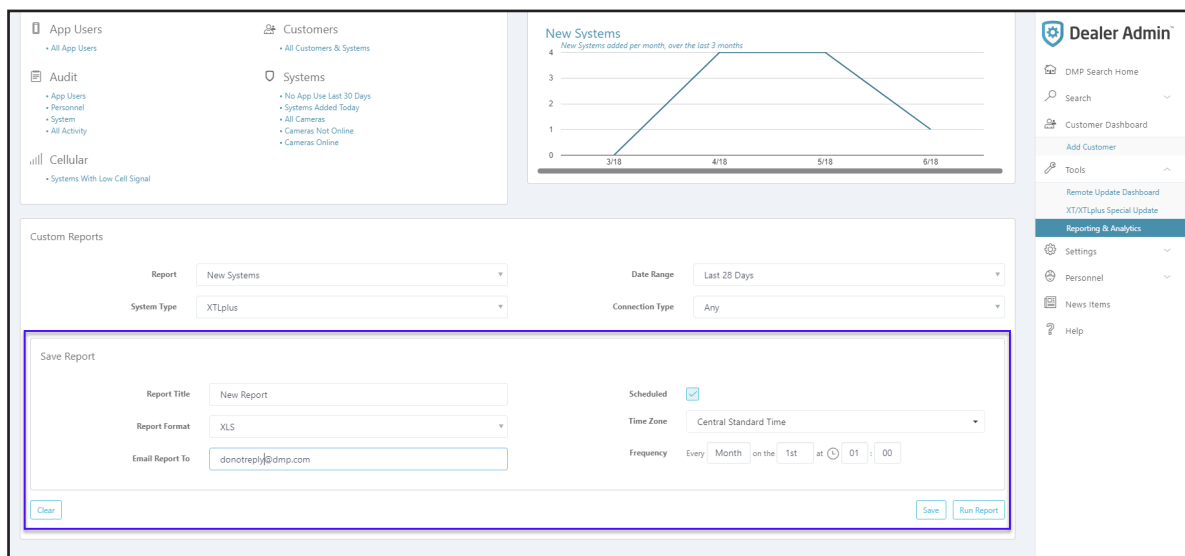

DMPDealerAdmin.com is updated to Version 2.7. The following feature is available.

Feature

Scheduled Reporting

You now have the ability to create custom scheduled reports in DMPDealerAdmin.com. After creating a custom report, you can schedule how often you would like to receive the report and which e-mail addresses you would like it to go to. Follow the directions below to create a custom scheduled report:

1. Log in to DMPDealerAdmin.com.
2. Click **Tools** in the navigation menu and select **Reporting & Analytics**.
3. In the **Custom Reports** section, customize a report and then click **Save Report**.
4. Enter a **Report Title**, select a **Report Format**, and enter the **Email** the report should be sent to. (You can enter multiple e-mail address, separated by a comma.)
5. Click the **Scheduled** box to allow it to be a recurring report.
6. Select a **Time Zone** and choose the **Frequency** at which the report should be generated and sent.
7. Click **Save** to allow the report to be sent at its scheduled time, or click **Run Report** to immediately run the report. See Figure 1.

The screenshot shows the Dealer Admin interface. On the left, there are navigation menus for App Users, Customers, Audit, and Cellular. The main area displays a 'Custom Reports' section with a 'New Systems' report selected. The 'Save Report' form is highlighted with a red box. The form includes the following fields:

- Report Title: New Report
- Report Format: XLS
- Email Report To: donotreply@dmp.com
- Scheduled: ☒
- Time Zone: Central Standard Time
- Frequency: Every Month on the 1st at 01:00

Buttons for 'Clear', 'Save', and 'Run Report' are visible at the bottom of the form.

Verizon LTE Filter

You can now filter your Customer Dashboard to display Verizon LTE customers, giving you another option to make your filtering process more granular. You can use this filter to find customers who need to upgrade to LTE before the 2022 CDMA sunset. Click **Filter** on the map and select **Carrier** to display the new filtering option.
