

HARDWARE UPDATE

CellComSL Series Universal Communicators

October 2017

Hardware Update

CellComSL Series Universal Communicators are now being manufactured with updated Level 101 hardware. Updated hardware will begin shipping immediately.

Features

External Antenna

CellComSL Series Universal Communicators now have a built-in external antenna. This improves the communicator's cellular strength in locations where signal is weak. This is beneficial in areas where the antenna needs to be remotely located.

Obtaining the New Hardware

New CellComSL Series Universal Communicators with Level 101 hardware can be ordered by contacting DMP Customer Service at 1-800-641-4282 or by visiting buy.dmp.com.
