Dealer Admin™ and Virtual Keypad™

FEATURE UPDATE | AUGUST 2021

New Features

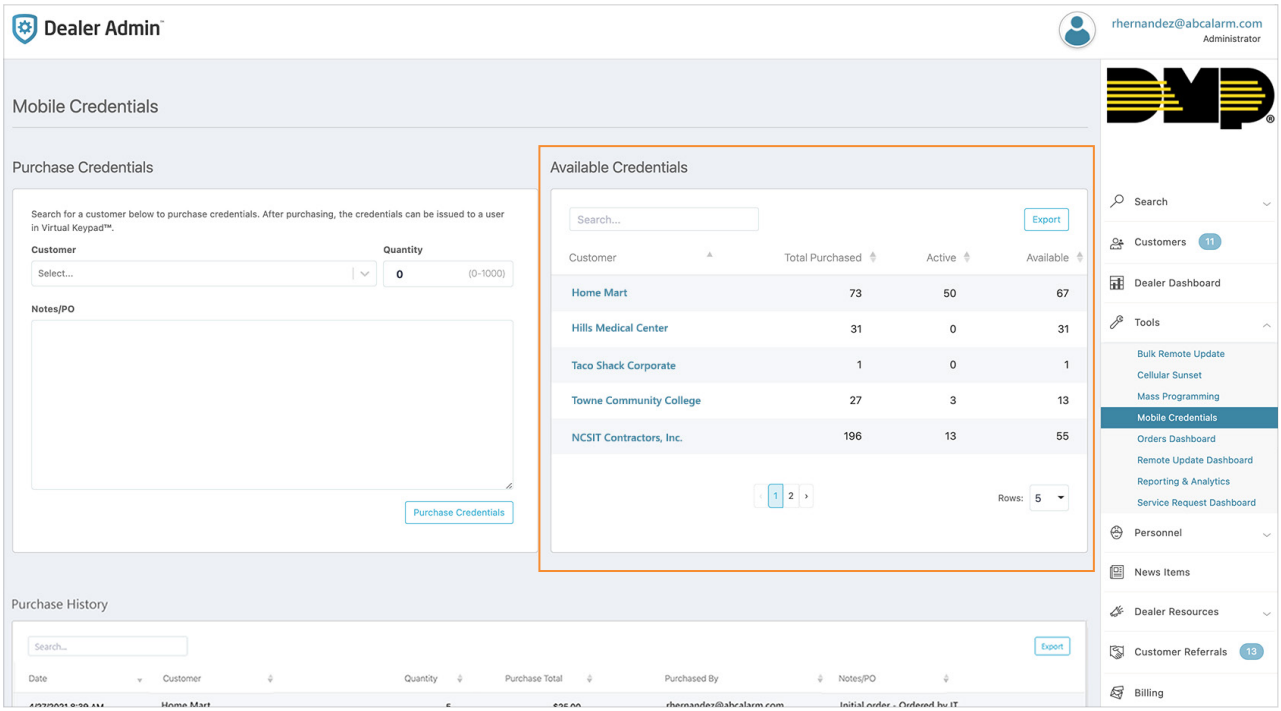
Effective August 25th, 2021, the following software is updated:

Dealer Admin	Version 2.68.0
Virtual Keypad App (iOS and Android)	Version 6.39.2
VirtualKeypad.com	Version 2.34.0

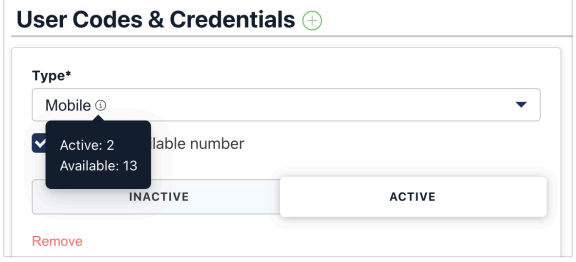
Mobile Credentials Improvements

The **Mobile Credentials page** in Dealer Admin now includes an **Available Credentials** section. This section contains information for each customer such as the total number of credentials purchased, the number of credentials that are activated, and the number of remaining credentials.

Additionally, your customers can also see the number of credentials they have left from Virtual Keypad when creating or editing **Users**. On VirtualKeypad.com, customers can also view their total number of active credentials.



Available Credentials in Dealer Admin



Number Active and Available in VirtualKeypad.com

Requirements

Reader Compatibility

Mobile Credentials are designed for the SR3 Bluetooth and Proximity Reader.

Dealer Admin Permissions

To purchase and manage credentials in Dealer Admin, you must have an **Administrator** role or a custom role with **Mobile Credential** permissions. For more information, refer to Dealer Admin Help: Personnel Roles.

Virtual Keypad Permissions

To view information about mobile credentials, users must have **User Codes** permission. For more information, refer to Virtual Keypad Help: Profiles Reference.

Get the Updated Software

Updates for the Virtual Keypad mobile app are available for free from the Google Play™ store and the App Store®.
