

New Features

Effective October 13th, 2021, Dealer Admin is updated to Version 2.71.0.

Automatic Log Out

For increased security, Dealer Admin now automatically logs out users after 15 total minutes of inactivity.

After 10 minutes of being inactive, a message pops up to notify the user that they will be logged out automatically in 5 minutes. If the user chooses to stay signed in, the sequence is reset. If the user takes no action, they are logged out automatically when the timer expires and Dealer Admin returns to the sign in screen.
