

## FEATURE UPDATE | OCTOBER 2021

### New Features

Effective October 22nd, 2021, Dealer Admin is updated to Version 2.72.0 (10/21/2021).

#### Manually Update X1 Controller

X1 Controllers automatically update 8 hours after being powered up or 8 hours after the latest firmware was available. Now, if a newly added or an already existing controller needs to be updated sooner, the X1 Series firmware can be manually updated through Dealer Admin. When an “Update Available” notification appears in System Information, select **Yes** to update.
