

Video Doorbell™

FEATURES

- ▶ Integrates video and voice capabilities for user's front door
- ▶ Provides integration with Virtual Keypad™
- ▶ Small, easy-to-install product
- ▶ 170-degree vertical field of view
- ▶ 1080p HD video
- ▶ Two-way audio communication
- ▶ Notifications and live camera view on Virtual Keypad app
- ▶ Motion detection regions
- ▶ Motion sensitivity settings
- ▶ Day/Night video functionality
- ▶ Pinch-to-Zoom for a closer look
- ▶ Optional NVR connectivity
- ▶ Uses existing doorbell power
- ▶ Weather-resistant case
- ▶ Wedge accessories included for flexible camera angle to fit entrance layout
- ▶ Access to stored video clips
- ▶ Compatible with most standard non-digital doorbells
- ▶ Back plate and power kit included

VIDEO DOORBELL

CAMERA CHARACTERISTICS

The V-4061DB Video Doorbell produces 1080p high-definition video with a 170-degree vertical view. The V-4061DB offers both day and night functionality. Video is still visible in low-light conditions.

IMAGE CAPTURE OPTIONS

Users have the option not only to view the doorbell's camera, but also to record video to document activity at their premises with the Virtual Keypad app — the same app they rely on to manage their security and home automation systems. The camera is engineered for fast connectivity and can be programmed to automatically record video clips when motion is detected. The user can opt to receive notifications any time motion is detected or the doorbell is pressed. With its 170-degree vertical field of view, the doorbell captures a complete "head-to-toe" view of visitors and any deliveries left at the doorstep.

ONBOARD STORAGE

The V-4061DB Video Doorbell includes a pre-installed 16 GB Micro SD Card, providing access to stored video clips that are ready to view anytime, anywhere through the Virtual Keypad app. The onboard storage keeps your surveillance recordings secure, and even if the user's Wi-Fi connection fails, the camera will continue to record any time motion is detected or the doorbell is pressed.

CONTINUOUS RECORDING OPTION

For continuous recording, the V-4061DB Video Doorbell can be connected to the eight-channel V-4408D NVR. The NVR delivers 2 terabytes (TB) of encrypted storage.

OUTDOOR DESIGN

The Video Doorbell is designed to withstand harsh environments as well as provide a high degree of vandal resistance. This allows reliable performance in most harsh environments.

MULTIPLE HOUSING COLOR OPTIONS

The V-4061DB Video Doorbell comes with four interchangeable faceplate options that are easy to install. Color options include white, black, brown and gold.

White Black Brown Gold

EASILY LEARNS IN WITH VIRTUAL KEYPAD APP

With SoftAP technology, users have a simple way to dynamically configure their Wi-Fi names and passwords into their doorbells and securely connect to their network. Virtual Keypad connects directly to the doorbell's Wi-Fi network and securely configures the Wi-Fi at your customers' homes or businesses.

BENEFITS OF 2.4 GHZ FREQUENCY

The V-4061DB Video Doorbell is engineered to work on the 2.4 GHz frequency band, which is the universal frequency for most routers. There are a number of advantages of tuning in to 2.4 GHz frequency; namely range. It delivers robust wireless solutions with better penetration through concrete walls and other obstructions to ensure premium Wi-Fi signal strength outside.
