

The Next Generation of ATM Security

TMSENTRY

As banking teller machines become more compact, interior space becomes a premium and the technology to protect them must become more robust. **TMSentry represents the latest alarm system technology designed specifically for monitoring ATMs and ITMs—providing the highest level of protection in the most compact size available on the market.**

BENEFITS

- **Industry-standard AES encryption.** Protects alarm signals from being intercepted.
- **Flexible communication options.** Variable options and Adaptive Technology™ ensure constant signal transmission.
- **Battery backup.** Provides continuous operation and alarm transmission during power outages.
- **Fast and easy compliance reports.** Inactive User Code auditing and Inactive Zone auditing make compliance reports simple and efficient.
- **Compact size offers optimal location placement.** Crucial security system components fit within the secured body of the ATM, as opposed to more vulnerable positions like the top or exterior.
- **DualSIM model** can use Verizon and AT&T networks. Choose to activate one provider—or both!

Features

Alarm Zones	6 Fully Supervised, Expand to 4 More
Network	Onboard Network and Cellular Communication
User Codes	30
Audit Reports	Inactive User Auditing and Inactive Zone Auditing
Power	Auxiliary Power for Keypad and Seismic Detector 24-hour Battery Backup
