

Version 108 Update

Updated Version 108 (9/23/25) firmware is now available for SCS-150 Main Processor Cards.

Panel Serial Number in Serial 3 Messages Support

This update supports panel firmware Version 254, which allows you to enable Serial 3 messages to include the panel serial number. If enabled, the panel family and corresponding serial number appear at the end of each Serial 3 message, allowing the monitoring center to identify the correct system if two panels unintentionally use the same account numbers.

For more information about updating the SCS-150, refer to the [SCS-150 Update Installation Sheet](#).

To use this feature, the following firmware versions are required:

- [XTL Series Version 254 \(9/19/25\)](#)
- [XT30/XT50 Version 254 \(9/19/25\)](#)
- [XR Series Version 254 \(9/17/25\)](#)
- [XT75 Version 254 \(9/19/25\)](#)
- [XF6 Series Version 254 \(9/19/25\)](#)
- [TMSentry Version 254 \(9/18/25\)](#)
- [Com Series Version 254 \(9/19/25\)](#)

Obtaining the New Firmware

SCS-150 updates are available, free of charge, on Dealer Admin (dealer.securecomwireless.com) or for download from DMP's [Product Firmware Downloads](#). You can also purchase the SCS150/UPDATE SD Card with pre-loaded firmware Version 108 (9/23/25) at buy.dmp.com.
