

## FEATURE UPDATE | MARCH 2021

### Version 2.11 Update

Effective March 8th, 2021, all Remote Link™ software will be manufactured with Version 2.11 (3/2/21).

#### Panel Version 211 Support

Remote Link now supports the following features from XR Version 211, XT Version 211, and COM Version 211:

##### *1100T Wireless Translator Support (XR, XT)*

Remote Link now supports adding the 1100T in **Device Setup** and programming zones in **Zone Information**.

##### *Network Communication Type (XTL+N)*

Version 2.11 now enables you to program the new XTL+N. Programming includes the network communication type and related settings.

##### *Changed Wireless Audible to Trouble Audible (XR, XT)*

In **System Options**, the name of **Wireless Audible** has changed to **Trouble Audible**. All troubles, including wireless, Z-Wave, and system troubles, now all follow this setting.

#### Improvements

Remote Link 2.11 contains the following improvements:

##### *Z-Wave Status Improvements*

Remote Link 2.11 improves how Z-Wave statuses are retrieved from panels with firmware Version 193 and higher. Z-Wave status can be viewed in **Panel > System Status > Z-Wave Status**.

##### *Performance Improvements*

Remote Link 2.11 fixes issues that might have occurred while displaying some 734 options, international tamper event reports, and operator access lists. Although these items may have been displayed incorrectly after being modified, this issue did not affect panel programming or communication to the central station.

### More Information

For more detailed information about features from panel firmware Version 211, refer to the Technical Updates from [DMP.com/Technical\\_Updates](https://DMP.com/Technical_Updates) and guides from [DMP.com/guides](https://DMP.com/guides).

### Obtaining the New Software

The most recent version of Remote Link is available for download, free of charge, at [DMP.com/Dealer\\_Direct](https://DMP.com/Dealer_Direct).
