Version 8.7.1 (8/11/20) Update

Effective August 12, 2020, all Entré Security & Access Management software will be manufactured as Version 8.7.1 (8/11/20).

Entré 8.7.1 works with panel firmware Versions 181 to 201.

Features

Delete the Badge and the Key Fob when Deleting Personnel

Previously, you had to delete a badge and personnel separately. Now, you have the ability to delete both at the same time. This saves time and helps with accuracy.

1. Right click on the Personnel record.
2. Select **Delete**.
3. Select **OK** to delete both or **Cancel** to close the message window.

Time Change

Entré allows you to enable a **Time Change** in System Options programming under **Edit - Panel**, below **Hours from GMT**. The options are **Yes** and **No**.

Added Ability to Edit the Network Encryption Passphrase

If network encryption is enabled via Panel Feature Key, the network passphrase can be edited. This feature is found under **Edit - Panel** > **Network Options**.

1. Go to **Edit - Panel**.
2. Open the **Feature Keys** tab.
3. Select **Encryption** to enable it.
4. Open the **Network Options** tab. The Passphrase should match the receiver.

Improvements

Device Status Viewable in Status List

All device statuses can be viewed in real time in the Hardware List. This displays the panel programming changes without having to perform another search.

Wireless Serial Number

The wireless serial number programming has been improved to prevent the leading 0 from being removed unintentionally.

Obtaining the New Software

Entré Security & Access Management software Version 8.7.1 is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.7.1 (8/11/20), please complete the Pre-Upgrade Checklist (LT-1782) before contacting the Software Support Team in DMP Technical Support at 888.436.7832.
