

### Version 1.4.6 Update

Version 1.4.6 (8/4/20) software is now available for download at [DMP.com/Dealer\\_Direct](https://DMP.com/Dealer_Direct). Effective August 6, 2020, all SCS-VR Virtual Receiver Software will be manufactured with Version 1.4.6 software.

### Feature

#### Updated Output Raw CID (ContactID) String

Previously, the SCS-VR was expecting an equipment message and the COM Series 202 would not send this equipment message, this caused the output to be incorrect. This new version resolves that problem and outputs the raw CID string whether or not an equipment message is at the end of the string.

**Example:** See the CID strings below. The bolded item is the equipment message, indicated also by "em."

- 4077 Ze\051\t "CD\g 01234 1 401 01 002\em"**000000114681**\
- 4077 Ze\035\t "CD\g 01234 3 401 01 002\
