

FEATURE UPDATE | MARCH 2020

Version 2.42.0 Update

Effective March 24th, 2020, Dealer Admin™ (dealer.securecomwireless.com) is updated to Version 2.42.0. The following feature is available:

Feature

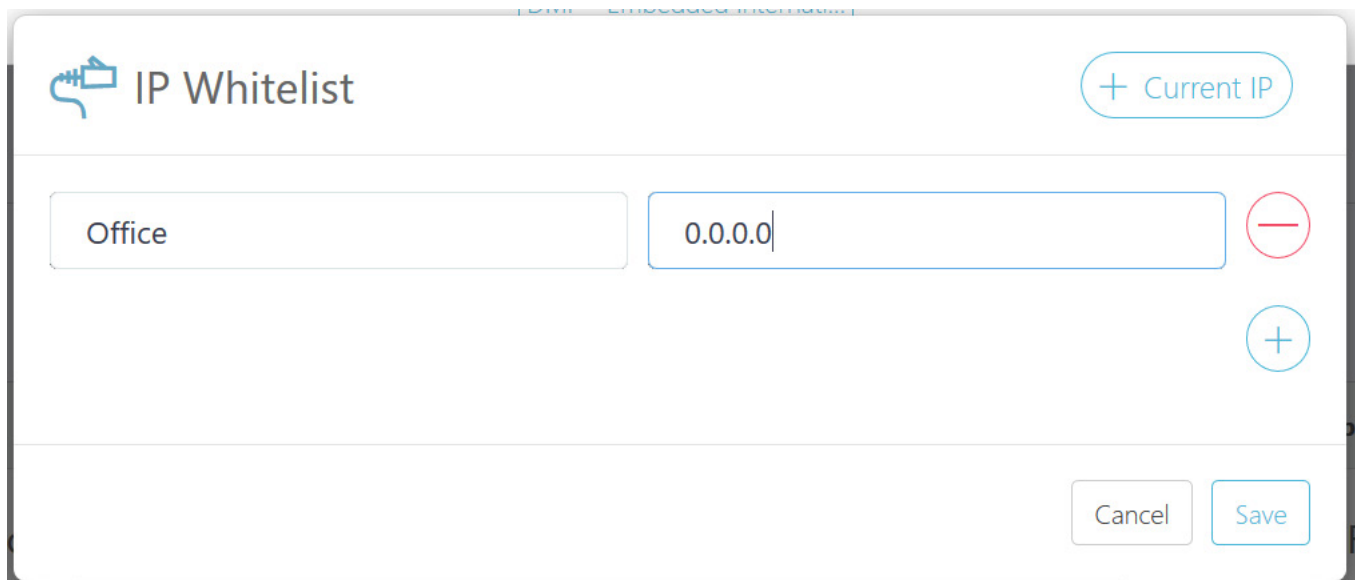

IP Whitelisting

IP Whitelisting allows you to restrict connection to Dealer Admin with a list of whitelisted public IP addresses and a custom role option. For example, only allow panel programmers to log in to Dealer Admin when their computer is connected to your corporate network.

Note: Do not whitelist dynamic IP addresses.

To enable IP Whitelisting, complete the following steps:

1. Sign in to [Dealer Admin](#).
2. Go to **Settings > Dealer**.
3. In the **Security Features** section, select **IP Whitelist**.
4. Select the Add icon. Enter the public IP addresses and locations. To add your current IP address, select **Current IP**.
5. Press **Save**.
6. Go to **Personnel > Custom Roles** and select the role that you want to restrict to whitelisted IP addresses.
7. In the **Limit Access** section, select **Only Allow Access to Dealer Admin from whitelisted IP addresses**, then press **Save**.

The screenshot shows the 'IP Whitelist' configuration window. At the top left is a headset icon and the title 'IP Whitelist'. At the top right is a button labeled '+ Current IP'. Below this is a table with two columns: 'Location' and 'IP Address'. The first row contains the text 'Office' in the location field and '0.0.0.0' in the IP address field. To the right of the IP address field are two circular buttons: a red one with a minus sign and a blue one with a plus sign. At the bottom right of the window are two buttons: 'Cancel' and 'Save'.

| Location | IP Address |
|----------|------------|
| Office | 0.0.0.0 |
