

## HARDWARE UPDATE

### Hardware Update

Effective October 30th, 2019, all 1100XH High Power Wireless Receivers are being manufactured with Level 103 Hardware and Version 205 firmware.

### Features

#### Design Improvements

The 1100XH now features an internal spiral antenna in place of the J-pole wire antennas. There are no changes to operation or performance as a result of this hardware update. The overall design has been improved and streamlined for your benefit.

#### Wireless Speed Improvements

Version 205 features wireless speed improvements. These changes improve wireless response time on 9800 Graphic Touchscreen Keypads and 1134 Wireless Wiegand Modules.

#### Additional Keypad Support

Version 205 allows up to seven wireless keypads and 1134 Wireless Wiegand Modules to communicate with XR150/XR550 Series panels using the receivers. To support this feature, the control panel must be updated to Version 191 or higher.

### Obtaining the New Firmware

The new 1100XH High Power Wireless Receivers can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting [buy.dmp.com](http://buy.dmp.com).
