

FEATURE UPDATE | JANUARY 2019

Version 111 Update

Version 111 (1/9/19) firmware is now available for download on the DMP Dealer Direct website at DMP.com/Dealer_Direct.

Effective January 28th, 2019, all 7800, 7801 (XTLtouch), and 9800 Series Graphic Touchscreen Keypads will be manufactured with Version 111 (1/9/19). Updated units will begin shipping as current inventory is depleted.

Feature

Multiple Card Format Support

Version 111 (1/9/19) shows new programming prompts to support Multiple Card Format. At the keypad, you can now program up to seven different card formats in addition to DMP format. The keypad's on-board proximity reader will accept multiple card formats as inputs for arming, disarming, and access control.

7872/7801/9800 keypads will accept multiple card formats for arming and disarming. 7873 keypads will accept multiple card formats for arming and disarming as well as for access control with the internal relay, using either the on-board card reader or external card reader.

Additionally, the 7800 Series keypad will now receive the same 734 options when programmed in the panel, ensuring that the same card formats are present in all 734s and graphic keypads on the system. To support receiving card formats from the panel, you must update your XR150/XR550 panel to version 183 firmware.

Obtaining the New Firmware

Firmware updates are available for download, free of charge, on the DMP Dealer Direct website at DMP.com/Dealer_Direct.

If you have any questions or concerns about implementing this firmware update, please contact DMP Technical Support by calling 1.888.436.7832 or emailing techsupport@dmp.com.
