

## **HARDWARE UPDATE | JANUARY 2019**

Effective January 4th, 2019:

- 734 Wiegand Interface Modules are now being manufactured with Level D hardware and firmware version 104.
- 734N Wiegand Interface Modules are currently manufactured with Level D hardware and firmware version 102.
- 734N-POE Wiegand Interface Modules are currently manufactured with Level 102 hardware and firmware version 102.

These are the minimum hardware and firmware requirements for compatibility with the new Multiple Card Format feature in the recent XR Series Version 183 Firmware Update. New units will begin shipping as current inventory is depleted.

### **Feature**

#### **Multiple Card Format Capability**

With 734 and 734N/734N-POE Wiegand Interface Modules, you can now program up to seven different card formats in addition to DMP format. To see multiple card format options in the panel, you must update your XR150/XR550 panel to version 183 firmware.

### **Ordering the New Wiegand Interface Modules**

The three new Wiegand Interface Modules can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting [buy.dmp.com](http://buy.dmp.com).
