

FEATURE UPDATE | JULY 2018

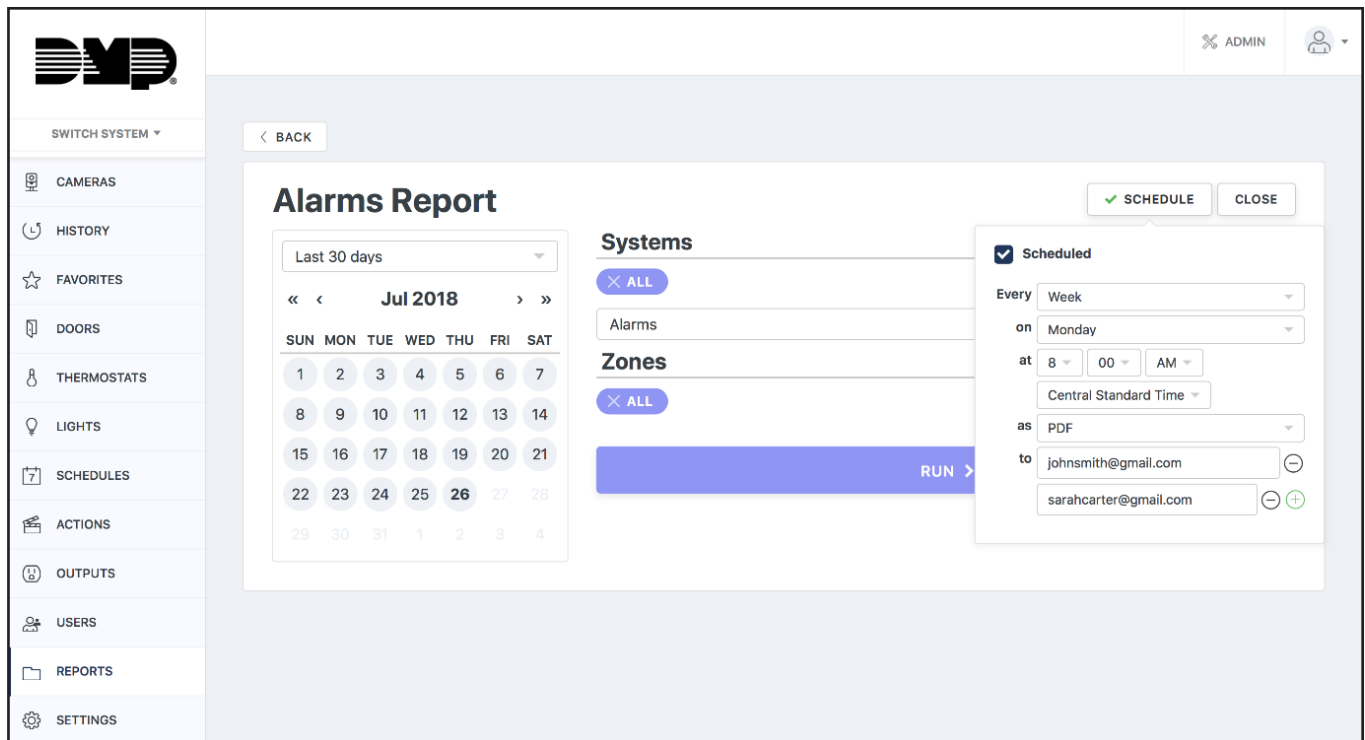

Version 2.5 Update

VirtualKeypad.com is updated to Version 2.5. The following feature is available.

Feature

Automated Reports

Users now have the option to select the date and time that reports get sent from VirtualKeypad.com. This allows users to customize a specific date, time, and email address. Click **Schedule** to personalize the report and who it is sent to.

The screenshot displays the VirtualKeypad.com web interface. On the left is a sidebar menu with icons and labels for: CAMERAS, HISTORY, FAVORITES, DOORS, THERMOSTATS, LIGHTS, SCHEDULES, ACTIONS, OUTPUTS, USERS, REPORTS, and SETTINGS. The main content area is titled "Alarms Report" and includes a "Last 30 days" dropdown, a calendar for July 2018, and sections for "Systems" (with an "ALL" button) and "Zones" (with an "ALL" button). A "RUN" button is located below the Zones section. A modal window is open on the right, titled "Scheduled", with a "SCHEDULE" button at the top. The modal contains the following fields: "Every" (Week), "on" (Monday), "at" (8:00 AM), "Central Standard Time" (time zone), "as" (PDF), and "to" (two email addresses: johnsmith@gmail.com and sarahcarter@gmail.com, each with a minus/plus icon for removal/addition). A "CLOSE" button is at the top right of the modal.
