

## FEATURE UPDATE | JUNE 2018

### Version 306 Firmware Update

Effective June, 2018, all 7000 Series Thinline LCD Keypads will be manufactured with updated Level J hardware and Version 306 (1/9/18) firmware.

### Updated Functionality

#### Supports Multiple Chimes

7000 Series Thinline LCD Keypads now support multiple chimes on XT30/XT50 and XR150/XR550 Series control panels running firmware Version 172 or higher.

In Zone Information, you can assign a DB (doorbell), ASC (ascend), or DSC (descend) tone to a Night or Exit zone. The default is DB for Exit zones and None for Night Zones. Having access to three distinct tones allows end users to easily differentiate between chime-enabled zones.

### Obtaining the New Firmware

To order new 7000 Series Thinline LCD Keypads with updated Level J hardware and updated Version 306 (1/9/18) firmware, contact DMP Customer Service at 1-866-266-2826 or [customerservice@dmp.com](mailto:customerservice@dmp.com).
