

XT30/XT50, XTLplus™, and XTLplus-GW Series Control Panels

FEATURE UPDATE | JUNE 2018

Version 181 Update

Version 181 (6/7/18) firmware is now available for download on the DMP Dealer Direct website at DMP.com/Dealer_Direct.

Effective July 9, 2018, all XT30/XT50, XTLplus, and XTLplus-GW Series control panels will be manufactured with updated Version 181 (6/7/18) firmware. All inventory will be updated by August 17, 2018.

Compatibility

- XT30/XT50 Series Panels
- XTLplus Series Panels
- XTLplus-GW Series Panels

Features

Separate Z-Wave™ Initialization

The option to initialize Z-Wave programming has been moved from **INITIALIZATION** in the **PROGRAMMER** (6653) menu to the **DIAGNOSTIC MENU** (2313). This change allows you to initialize Z-Wave programming without affecting any other areas of panel programming.

Z-Wave Version Identification

You can now view the Z-Wave Interface Module Version a system is using from an associated keypad.

1. Enter **2313** to access the **DIAGNOSTIC MENU**.
2. Select **PANEL SETTINGS**.
3. Press **CMD** until **Z-WAVE HARDWARE** displays. The Z-Wave Interface Module model number and firmware version display below this.

Updated Functionality

Faster Favorite Activation

With XT30/XT50, XTLplus, and XTLplus-GW Version 181 (6/7/18), favorites activate faster and provide improved device control stability.

Kwikset 10-Key Lock Status

With XT30/XT50, XTLplus, and XTLplus-GW Version 181 (6/7/18), the correct status of a locked or unlocked 10-Key Kwikset™ Lock will display in the Virtual Keypad™ app, VirtualKeypad.com, and on an associated keypad.

Obtaining the New Firmware

Firmware updates are available for download, free of charge, on the DMP Dealer Direct Website at DMP.com/Dealer_Direct.
