

CellComSL Series Universal Communicators

February 2018

Effective February 26, 2018, CellComSL Series Universal Communicators will be manufactured with updated Version 125 (11/17/17) firmware. Updated units will begin shipping as current inventory is depleted. All inventory will be updated by early April 2018.

Features

Suspended Cell Suppression for Testing

Now, after resetting a CellComSL Series Universal Communicator or exiting the Programmer menu, cell suppression will not occur for 30 minutes. This allows technicians a 30-minute window during which they can perform any necessary system testing. If more time is needed, the technician can reset the panel again to suspend cell suppression for another 30 minutes.

Obtaining the New Firmware

Firmware updates are available for download, free of charge, on the DMP Dealer Direct Website at DMP.com/Dealer_Direct.
