

SCS-150 Main Processor Card

January 2018

Version 104 Software Update

SCS-150 Version 104 (12/14/17) software is now available for download on the DMP Dealer Direct Website at DMP.com/Dealer_Direct.

All SCS-150 Main Processor Cards are now being manufactured with Version 104 (12/14/17) software. Version 104 (12/14/17) software will begin shipping as current inventory of SCS-150 Main Processor Cards is depleted. All inventory will be updated by January 10, 2018.

Features

Send Stored Messages (*XT30/XT50 and XTLplus only*)

SCS-150 Version 104 (12/14/17) supports the Send Stored Messages feature of upcoming panel firmware Version 172. If Send Stored Messages is enabled, an XT30/XT50 or XTLplus Series panel with Version 172 firmware will store any messages that are not able to be sent while communication to the receiver is down. Once communication is restored, the panel will send all stored messages to the receiver. Each stored message provides the number of minutes ago the event occurred.

The receiver's SCS-104 Receiver Line Card must be Version 103 (10/16/17) or higher for this feature to be available. Also, Send Stored Messages must be enabled for the panel to send a special check-off message to the receiver's IP2 once communication is restored to IP1. See the SCS-104 Receiver Line Card Version 103 (10/16/17) Technical Update ([TU-0854](#)) for more information.

Obtaining the New Software

SCS-150 software updates are available for download free of charge on the DMP Dealer Direct Website at DMP.com/Dealer_Direct. See the SCS-150 Installation Sheet (LT-1056) for more information on how to update the software.
