

265C Cellular Communicator and XTLplus Series Plastic Housing

November 2017

Hardware and Plastic Update

265C Cellular Communicators are now being manufactured with updated Level 101 hardware. XTLplus Plastic Housings are now being manufactured to support Level 101 hardware. Updated hardware and plastic will begin shipping November 30, 2017.

Features

External Antenna

265C Cellular Communicators now have a built-in external antenna. This improves the communicator's cellular strength in locations where signal is weak. This is beneficial in areas where the antenna needs to be remotely located.

XTLplus Plastic Housing Update

All XTLplus Series panels will be shipped with an updated housing to support the addition of the 265C with an external antenna.

Obtaining the New Hardware and Housing

265C Cellular Communicators with Level 101 hardware and updated XTLplus plastic housings (XTL+-HSG-W) can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting buy.dmp.com.
