

## XT30/XT50 Series Control Panels

April 2017

### Hardware Update

XT30/XT50 Series panels are now being manufactured with updated Level N hardware. Updated hardware will begin shipping as current inventory is depleted.

#### Cell Pin Header Shroud

XT30/XT50 Series panels now have a built-on plastic shroud around the cell pin header. This plastic shroud prevents the pins from vertically misaligning when a cellular communicator is installed. Misaligning pins can cause damage to both the panel and the cellular communicator.

### Obtaining the New Hardware

New XT30/XT50 Series panels with Level N hardware can be ordered (after current inventory is depleted) by contacting DMP Customer Service at 1-800-641-4282 or by visiting [buy.dmp.com](http://buy.dmp.com).
