

## XR150/XR550 Series Control Panels

March 2017

### Hardware Update

XR150/XR550 Series panels are now being manufactured with updated Level H hardware. The updated hardware will begin shipping as current inventory is depleted.

#### Cell Pin Header Shroud

XR150/XR550 Series panels now have a built-on plastic shroud around the cell pin header. This plastic shroud prevents the pins from horizontally misaligning when a cellular communicator is installed. Misaligning cell pins can cause damage to both the panel and to the cellular communicator.
