Virtual Keypad App™ for Apple TV®

February 2017

Virtual Keypad App™ for Apple TV®

The Virtual Keypad App™ will now be available as a free Apple TV® app for 4th Generation or newer Apple TVs®. Version 1.0 (2/3/17) of this app will be available on February 3, 2017.

Features

The Virtual Keypad App™ for Apple TV® is a convenient way for users to monitor and control certain parts of their security systems from their TV screen. From the app, users can view their cameras, watch pre-recorded clips, and activate their Z-Wave Favorites. The app can also be linked to multiple systems, if needed.

Cameras

Users can view cameras on their security system live through the Virtual Keypad App™ for Apple TV®. Multiple cameras can be viewed on-screen at once, or a single camera can be viewed full-screen.

Clips

The Virtual Keypad App™ for Apple TV® gives users the ability to view pre-recorded clips from the cameras on their system.

Favorites

Z-Wave Favorites can be activated through the Virtual Keypad App™ for Apple TV®, allowing users to control their home automation from their TV.

Obtaining the New App

The Virtual Keypad App™ for Apple TV® can be downloaded through the App Store available on 4th Generation or newer Apple TVs®. Open the App Store, and search for "Virtual Keypad". Locate the Virtual Keypad App™ and select Download.
