

## 711 Zone Expansion Module

November 2016

### Hardware Update

All 711 Zone Expansion Modules are now being manufactured with Level J Hardware and an updated case design. Updated devices will begin shipping in the middle of December 2016 when current inventory is depleted.

#### New Case Design

The 711 case now features a streamlined plastic design that is easy to open and close. To open the case, press the button on the end of the 711 and gently pull up on the transmitter cover. See Figure 1.

The 711 housing also features a PCB latch that allows installers to easily remove the PCB by pressing the latch with their thumb. See Figure 2.

#### Updated Terminal Block

With the transition to Level J Hardware, the 711 includes a new low-profile terminal block. See Figure 2. Standard software features remain the same.

### Obtaining the New Hardware

New 711 Zone Expansion Modules can be ordered by contacting DMP Customer Service at 1-800-641-4282 or by visiting [buy.dmp.com](http://buy.dmp.com).

### 2G Network Shutdown

Do you have all your 2G accounts upgraded already? The end of 2G is near. On December 31st, 2016, all AT&T 2G systems will cease to operate. This will affect your XT and XTL Series panels with built-in GSM cell modules, as well as your 263G and 463G cellular modules.

For all SecureCom Wireless customers, we have customized reports available to you that list your current 2G communicators still in use.

Get your company's custom report by emailing [CustomerService@securecomwireless.com](mailto:CustomerService@securecomwireless.com) or calling us at 877-300-8030. Find out which of your accounts are still on 2G and update them before it's too late.
