

9000 Series Wireless Keypads

August 2016

Version 200 Firmware Update

Beginning September 12, 2016, 9000 Series keypads will be manufactured using Version 200 (7/20/16) software. Updated keypads will begin shipping as current inventory is depleted, which is estimated to occur in late October 2016.

Updated Operations

Improvements

Version 200 (7/20/16) includes wireless speed enhancements when paired with XTLplus or XT50 Series panels with Version 125 (expected August 2016) or higher.

Obtaining the New Firmware

To send in your keypad for a firmware update, log in to the Customer Return Center website at dmp.com/returncenter, submit an RMA request, and return your unit to DMP. You can learn more about the Customer Return Center website or the RMA process by exploring the resources available at dmp.com/returncenter.
