
Entré Security & Access Management Software**August 2016**

Version 7.9.5 Update

Effective August 5, 2016, all Entré Security & Access Management software is being manufactured as Version 7.9.5 (8/2/16). If your current Entré software is previous to Version 7.9.0, update to Version 7.9.0 before updating to Version 7.9.5 (8/2/16).

Features**Performance Improvements**

General performance improvements have been made to hardware tasks and interactions. These enhancements will be particularly noticeable for large, multi-panel installations.

Support for Card Plus PIN By Profile

Entré now supports the Card Plus PIN By Profile feature that was made available with XR550 Version 105. Profiles featuring Card Plus PIN can be applied to individual users. Once applied, users are required to present two credentials when requesting access. This offers a higher level of access restriction for select users.

734 Entré Central Station Programming

With Version 7.9.5, 734 Interface Modules can be programmed through Entré Central Station. Previously, installers had to connect to the 734 Interface Module through Remote Link™ software or an onsite hardwired keypad. Installers are now able to program any 734 Interface Module through their Entré Central Station portal.

Delete Panels from the Entré Database

To increase database access efficiency, installers and end users can now delete panels through Entré Central Station. If a panel is incorrectly or incompletely added to Entré, it can be deleted to avoid redundant or unnecessary data.

Support for XR550 Version 111

Entré supports XR550 firmware up to and including Version 111. New available features include AX-Bus door compatibility.

Longer User Codes

Entré now accommodates user codes with up to 12 digits.

Support for 96 doors

Support for 96 doors has been added to Entré. Version 7.9.5 is compatible with AX-Bus expansion door controllers on Version 111 of XR550 Series panels. This allows for up to 96 doors per panel.

Spanish Translations

Spanish translations are now available for all updated Entré Version 7.9.5 functionality.

Badge Editor Profile Search Function

Users can now search for a profile when editing or creating a badge. This allows large companies to quickly locate and apply specific profiles without scrolling through a list of all available profiles. See Figure 1.

The screenshot shows the 'Add - Single-Screen Wizard' window. The 'General' tab is active, displaying fields for Card # (45621), Hot stamp (157645), Facility code (0), Badge type (Standard), Linked temp. card #, Assigned to (Ellison, Kevin), Validity (Active), Watch level, Effective/Expires dates, Partition, and Comments (Dallas Access Card). The 'User Code' section shows a User code of 45621. The 'Privileges' section has tabs for 'User Code Profiles' and 'Access Level Groups'. The 'User Code Profiles' tab is selected, showing a search bar with 'Dallas' entered and a list of profiles: 3153L, Dallas Branch 13114, Dallas Branch 13115, and Dallas Branch 13116. A blue arrow points to the search bar.

New Credential Types

The Credential Types portion of Entré's Personnel Editor now offers more options. Tabs have been added for Keys, Parking Passes, Logins, and Support Documents. See Figure 2. These new sections are for record keeping only and are not sent to the panel.

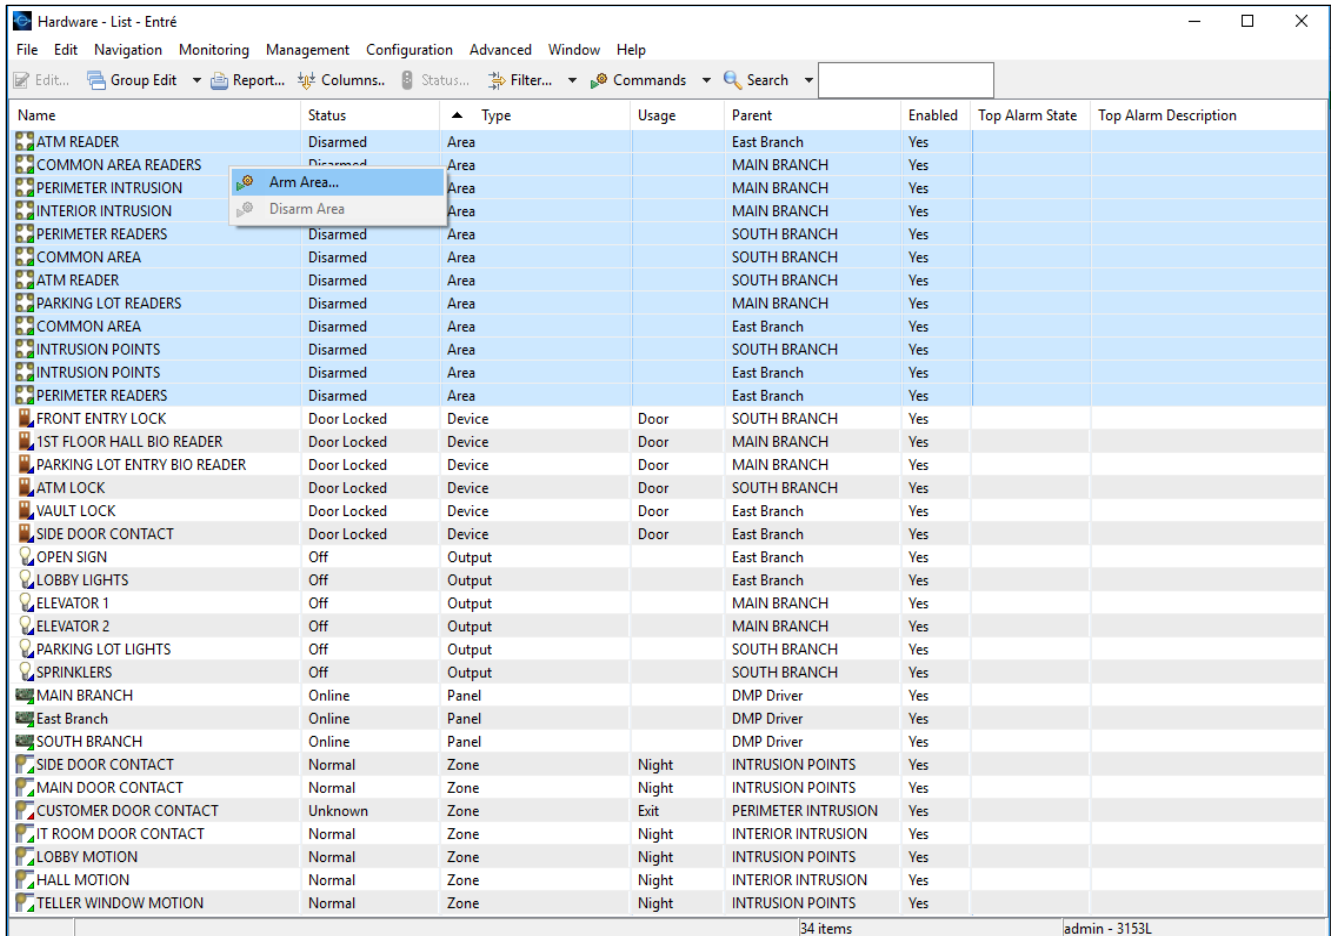

The screenshot shows the 'Add - Personnel Record' window. The 'Vital' section contains fields for First name (Kevin), Last name (Ellison), ID# (590441190), and Partition. The 'Contact' section has tabs for Address, Phone, and Email, with fields for Home, Work, and Other addresses. The 'Occupational' section has fields for Title in organization (Director, Web Services), Personnel type, Organization, User ID, Status (Active), and Department. The 'Credentials' section has tabs for Badges, Keys, Parking Passes, Logins, and Support Documents. The 'Badges' tab is selected, showing a table with columns: Key Name, Key Number, Key Level, Key Manufacturer, and State/Province. A blue arrow points to the 'Badges' tab.

Key Name	Key Number	Key Level	Key Manufacturer	State/Province

Hardware List

In addition to the standard Hardware Tree, Entré now offers an alternative hardware list. This list allows quick sorting, grouping, and management of hardware using search and column headers. See Figure 3.
