

Video Wireless Access Point Version 3.16.9

April 2016

Version 3.16.9 Update

DMP model V-IP1006RR High-Speed Video Wireless Access Points (WAPs) are now being manufactured with Version 3.16.9 (2/22/16) and contain the following update.

Features

Added SecureCom SSID

Starting with Version 3.16.9 (2/22/16), WAPs sold by DMP have two SSIDs (Wi-Fi network names). Now, you can automatically connect XTLplus panels and 763 Wi-Fi modules to a WAP via the “SecureCom” SSID. The “Video” SSID is still available for automatically connecting DMP cameras to an access point.
