

## MyVirtualKeypad.com™ Browser

January 2016

### Version 1.9 Update

Effective January 12, 2016, the MyVirtualKeypad.com™ Browser has been updated to Version 1.9.

### Feature

The following feature will only display if the Advanced Reports checkbox has been enabled when setting up a panel in the dealeradmin.securecomwireless.com Dealer Admin Site. Please see the Technical Update for dealeradmin.securecomwireless.com (TU-0834) for more information on Advance Reports options.

This feature is compatible with the XR150/XR550 Series control panels operating with Version 110 or higher firmware

### Real-time Status Messages

#### Reports

##### Custom Reports

Three new types of events have been added to the Custom Reports Type drop down list. If more than one system is associated with the app user, then Systems will display a list of associated systems. Enable one or more checkboxes of the system(s) to include in your custom report. Customize your report by choosing the Type of event and Range of time for the report.

- Door Access Report- Lists Access Denied and/or Access Granted for the selected Users and Doors.
- Door Status - Lists the status of the selected Door(s) for a selected Range.
- Output Status - Lists the status of the selected Output(s) for a selected Range.

The screenshot shows the 'Custom Reports' section with a 'Systems' dropdown menu open. The menu lists 'Route 66 Diner' and 'Betsy's Books', with 'Betsy's Books' selected. Below the menu, the 'Type' dropdown is set to 'Output Status'. The 'Range' dropdown is also visible, and a 'Generate' button is at the bottom.

The screenshot shows the 'Custom Reports' section with 'Systems' set to 'Downtown Office', 'Springfield Office', and 'St. Louis Office'. The 'Type' dropdown is set to 'Door Access', and the 'Range' dropdown is set to 'Today'. The 'Generate Report' button is at the bottom.

Door Access

### Output Status

### Automation

The MyVirtualKeypad.com™ Browser now provides Real-Time Status messages for panel Real-time Output Status, Real-time Zone Status and Real-time Door Access Events. A status is shown for Door Devices if Door Real-time Status is selected in Device Setup. A status is shown for an output if Real-time Status is selected in Output Information.
