# **Report Types**

 Types
 XT30/XT50 Series, XTL Series, and XR150/XR550 Series panels can display the following reports:

 Run a User by System Report
 List all System User Codes and authority levels.

 Run a User by System Report
 This report displays a list of Users for the selected system. The list

This report displays a list of Users for the selected system. The list can be reordered by clicking on the ascending and descending arrows next to each title of the report.

XT30/XT50 Series, XTL Series, CellComSL and iComSL panels display a list of all the users of the selected system in user number order.

XR150/XR550 Series panels also display a list of all the users of the selected system in user number order. The profiles assigned to each user are also displayed.

#### Run an Events by Date Range Report

Run an Events by Date Range Report List panel events filtered by type and date/time range.

Run a Profiles Report

List all panel profiles.

The Events by Date Range Reports lists panel events filtered by type of event and date/time range.

#### Run a Profiles Report (XR150/XR550 Series Only)

This report displays a list of user profiles with their corresponding access areas. Use the Select Access Area dropdown to filter the list to display profiles assigned to a particular access area.

#### **Viewing and Exporting Reports**

Reports can be viewed in the browser window, exported to a CSV or PDF file, or copied to the clip board.
