

Vk.securecomwireless.com Dealer Website

September 2014

Version 1.9.1 Update

Effective September 12, 2014, the vk.securecomwireless.com Dealer Website has been updated to Version 1.9.1 (9/11/14).

Features

Panel Country Code

The Country Code field now displays for each panel in Security Panel Connection Details when Cellular is selected as Communication Type. The field is not displayed for other communication types. This feature allows control panels located outside the United States to connect with the DMP Virtual Keypad App or MyVirtualKeypad Browser.

Security Panel Connection Details

Receiver Number *

Account Number *

Panel Serial Number

Communication Type *
Cellular ▼

Country Code
United States (+1) ▼

Leave blank unless communication address is a phone number.

Communication Address (Phone number or network address) *

Examples: 5551231212, 192.168.1.1, mypanel.mydomain.com:3000
If phone number is within the US, do not add leading "+1" or "1".
