

ePAD Software Update January 2012

Version 5.0 Software Update

Effective January 6, 2012 all ePADs will be manufactured with Version 5.0 software.

The ePAD Version 5.0 (11/23/11) software is now available for download on the DMP Dealer Direct Website at <http://dmp.com/dealer>. This version is an update from the Version 202 (6/31/09) software and contains new features.

Features

HTML Browser Support

Version 5.0 (11/23/11) software is now improved to serve HTML 5.0 type web pages for enhanced compatibility with PC browsers. In addition, this allows operation on the Android browser and the Safari browser of the Apple iPad/iPhone. The addition of the compatibility of these mobile browsers now creates the opportunity for the ePAD to be used in Mobile Control applications, just like an app or text message control of your system. There are no monthly costs or fees associated with the use of the ePAD.

Previously, the ePAD served web pages using a Java web applet.

Unfortunately, due to the complexity of supporting multiple browsers, keypad sounds from the web page such as sirens are no longer supported.

Obtaining the New Software

ePAD software update Version 5.0 (11/23/11) is available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
