

1119 Wireless Sounder

October 2011

Hardware Update

Effective October 2011, all 1119 Wireless Sounders are being manufactured with Level G hardware. The updated hardware will begin shipping as current stock is depleted which is estimated to begin early December 2011.

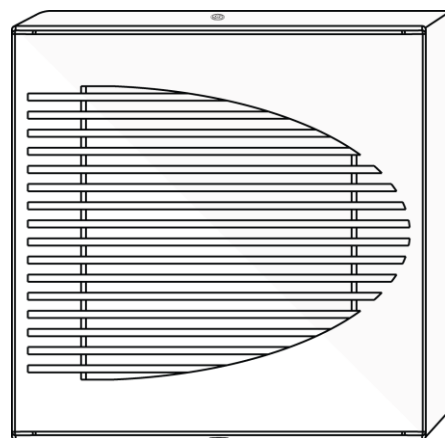

Updated Hardware

Wireless Sounder Volume

The 1119 Level G hardware now is improved to provide a higher sounder volume output and a siren sound instead of a steady tone. These improvements allow for enhanced audible notification.

Wireless Sounder Housing

The 1119 Sounder will also begin shipping using the same louvered housing as the Model 1135 Wireless Siren.

To accommodate the louvered housing, the zone terminal block has been reversed. The non-polarized zone wiring now enters the terminals from the right side of the block as shown in the diagram.

Ordering Information

The 1119 Wireless Sounder can be purchased at buy.dmp.com or by contacting Customer Service at 1-800-641-4282.

The updated hardware will begin shipping as current stock is depleted which is estimated to begin early December 2011.
