

## 734 Wiegand Interface Module August 2011

---

### Version 102 Firmware

Effective August 26, 2011 all 734 Wiegand Interface Modules are being manufactured with Version 102 (7/25/11) firmware. As of September 28, 2011, inventory for the 734 modules will be completely updated to Version 102 (7/25/11) firmware.

### Feature

#### HID RPK40CKNN Card Plus Pin Readers

When the 734 is programmed for CUSTOM CARD format and connected to an HID RPK40CKNN keypad reader, XR500E Card Plus Pin user code entry operation is now available. The 734 accepts two code entries from this reader to send to the XR500E. The first must be a Custom Card code entry from the card reader and the second must be from a manual entry at the RPK40CKNN keypad. The second entry is the user's PIN code and must be 65535 or less.

### Ordering the New Firmware

The 734 Wiegand Interface Module can be purchased at [buy.dmp.com](http://buy.dmp.com) or by contacting Customer Service at 1-800-641-4282.
