

## SCS-VR July 2010

---

### Version 1.3.1 Software Update

Effective July 2010, all SCS-VR Virtual Receivers are being manufactured as Version 1.3.1 (7/2/10). This version contains new features added to obtain the ANSI/UL Listing for UL 1076 Proprietary Burglar Alarm Units.

### New Features

#### Version Display

SCS-VR now displays the software version and software type (Enterprise or Professional) in the Setup Console.

#### SCS-VR Supervision

When SCS-VR is running on two different computers for a UL 1076 installation, the Setup Console displays a warning window to the user after 30 seconds when an SCS-VR is stopped or communication is lost between the computers.

#### Database Connection Supervision

When SCS-VR is running on two different computers for a UL 1076 installation and they are sending/receiving database information from a third computer, the Setup Console now informs the user with a warning window within 30 seconds when the database connection has failed.

#### Build Number

The build number no longer appears in the Automation tab as it was for internal use only.

### Ordering New Firmware

SCS-VR Version 1.3.1 update will be automatically provided to dealers who have previously purchased an SCS-VR license and are current with their SCS-VR support agreement.
