

## 1100R Wireless Repeater

---

July 2010

### Hardware Update

Effective July 2010, all 1100R Wireless Repeaters are being manufactured with Level C hardware.

### Updated Hardware

#### Wall Tamper

The style of the wall tamper has been changed from a mechanical switch utilizing a spring to a carbon puck with a rubber switch mounted in the housing.

Additionally, a two-pin header has been added to allow the the wall tamper circuit to be enabled as required for specific applications. The wall tamper will ship from the factory disabled.

#### Power Supply

The barrel style DC power supply connection has been updated to a two-position terminal block. The new model 376L 12 VDC Plug-in power supply provides wire connections to the repeater and can be purchased separately.

### Purchasing the New Hardware

The 1100R Level C hardware can be purchased at [buy.dmp.com](http://buy.dmp.com) or by contacting Customer Service at 1-800-641-4282.
