

1100X Feature Update July 2009

Version 107 Software Update to Support UL Commercial Fire Operation

Effective July 2009, all 1100X Wireless Receivers are being manufactured with updated hardware Level F and Version 107 (4/21/09) software. This software version is an update from the Version 106 (10/31/08) previously shipped and contains new features. The Level F UL Commercial Fire listed production units begin shipping once current inventory is depleted, approximately August 2009.

XR100 and XR500 Version 203 (5/1/09) software is needed to support the new 1100X Version 107 software and hardware features. If older panel software is used the 1100X will operate, but the tamper switches will not be recognized. See TU-0517 for more information.

Features

Level F Hardware Updates

The new Level F 1100X hardware now provides wall and cover tamper switches as required by UL Standard 864 for Commercial Fire. The 1100X is now UL listed for the following standards:

ANSI/UL 365	Police Station Connected Burglar
ANSI/UL 609	Local Burglar Alarm Units and Systems
ANSI/UL 636	Holdup Alarm Units and System
ANSI/UL 1023	Household Burglar Alarm System Units
ANSI/UL 1076	Proprietary Burglar Alarm Units
ANSI/UL 1610	Central Station Burglar Alarm Units
*ANSI/UL 864	Fire Protective Signaling Systems
ANSI/UL 985	Household Fire Warning System

*New UL Listing

Wireless Transmitters

The 1100X also supports the following new 1100 Series wireless models:

- 1165 Wireless Commercial Smoke Detector
- 1165H Wireless Commercial Smoke Detector w/Sounder
- 1165HS Wireless Commercial Smoke Detector w/Heat Detector and Sounder
- 1181 Wireless PIV
- 1182 Wireless OS&Y

Purchasing the New Hardware

The 1100X Wireless Receiver, Level F hardware can be purchased at buy.dmp.com or by contacting Customer Service at 1-800-641-4282. Older 1100X Receivers built prior to the Commercial Fire UL listing cannot be updated to Level F.
