

## XR100 and XR500 Canadian Update

July 2009

### Canadian XR100 and XR500

Effective July 2009, DMP is releasing Canadian versions of the XR100 and XR500 Command Processor panels using software version 203 (7/2/09). The Canadian version panel includes revised software operation required by Underwriters Laboratories of Canada (ULC) to meet ULC S304-M88 Level 4 and Level 5 line security for cellular communication.

### Canadian Versions Only

#### Supervision Check-in Message

When CELL is the Primary communication path and the Check-In Minutes is programmed for 3 minutes, the supervision check-in message to the receiver is actually sent every 90 seconds.

#### Message Retried

When CELL is the Primary communication path and there is not a Backup path programmed and the Check-In Minutes is programmed for 3 minutes, a panel event message sent to the receiver but not acknowledged, is retried every 90 seconds until acknowledged by the receiver. All subsequent events are stored during the failed communication period and then sent upon communication restore. In addition, during the failed communication period, supervision check-in messages are not attempted to the receiver.

### Obtaining the New Canadian XR100 and XR500

Canadian XR100 and XR500 Series Command Processor panels may be purchased from the DMP Dealer Direct Website at <http://dmp.com/dealer> and directly from DMP Customer Service at 800-641-4282. Specify the suffix CAN at the end of the XR100 or XR500 model number.
