

## XR100 and XR500 Series September 2007

---

### Version 119 Software Update

Effective September 2007, all XR100 and XR500 Series Command Processor panels are being manufactured with Version 119 (9/7/07) software. This version is an update from the Version 119 (7/18/07) software previously available and contains updated operation.

### Updated Operation

#### Auto Recall Test

For XR100 and XR500 Dialer only panels using Comm Type DD or CID, and with the J23 jumper set to the L or X position for LX-Bus or 1100X Wireless, an Automatic Recall Test (S07 or S88) was not sent to the receiver.

This issue does not occur in the following cases:

- Panel software versions before version 118 2/26/07
- XR100N or XR500N or XR500E panels
- XR100 or XR500 panels with the J23 jumper set to R for RS232 direct connect communication
- XR100 or XR500 panels when PC Modem in Remote Options is set to Yes for use with Remote Link
- XR500 panels when a Model 462N network card is attached

### Obtaining the New Software

XR100 and XR500 Series software update Version 119 (9/7/07) is available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
