

Version 1.4.6 (4/6/21) Date Code Update

Effective April 12th, 2021, all SCS-VR Virtual Receiver Software will be manufactured with Version 1.4.6 (4/6/21) software.

Improved Check-In Message Backups

When a backup database is configured, SCS-VR writes panel check-in messages to the primary database and copies them to the backup database. In previous software versions, SCS-VR attempted to copy check-in messages to the backup database even if it was down. This issue is resolved with this date code release.

Obtaining the New Software

SCS-VR Version 1.4.6 (4/6/21) is now available for download at DMP.com/Dealer_Direct.
