

Version 104 Update

Effective December 10th, 2018, the 738Zplus Z-Wave™ Interface Modules will be manufactured with Version 104 (11/21/18) firmware. The following feature is available for the 738Zplus with Version 104.

Feature

Improved Support for Yale and August Z-Wave Locks

Version 104 now allows integration with August locks. This firmware also ensures accurate status updates from Yale locks, as well as the ability to disarm your system upon code entry at the lock. A new 738Zplus with Version 104 or higher and XT Series Version 183 firmware are required for full support.
