

XR100 and XR500 Series

July 2008

Version 200 Software Update

XR500 Series Version 200 (6/19/08) is available for download from the DMP Dealer Direct Website at <http://dmp.com/dealer>. This version is an update from the Version 200 (5/9/08) software previously available and contains updated operation.

The XR500 Series Command Processor™ panels will continue to be manufactured with Software Version 121 also available for download free of charge on the DMP Dealer Direct Website.

Updated Operation

Receiver Network Messages

When Remote Link was attempting to connect to a panel at the same time the panel was attempting to send a network message to the receiver, the panel would on occasion send the message to Remote Link.

Zone Status Display

An FA Series wireless transmitter would always display NORMAL in the Diagnostics Zone State menu, even when the transmitter's zone was faulted.

Keypad Display

When Time Display was set to NO for the keypad and any top row key was pressed at the Status List, the display would advance to ARM DISARM instead of the list of faulted zones.

Obtaining the New Software

XR100 and XR500 Series software update Version 200 (6/19/08) is available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
