

FEATURE UPDATE | APRIL 2021

New Features

The following apps are updated:

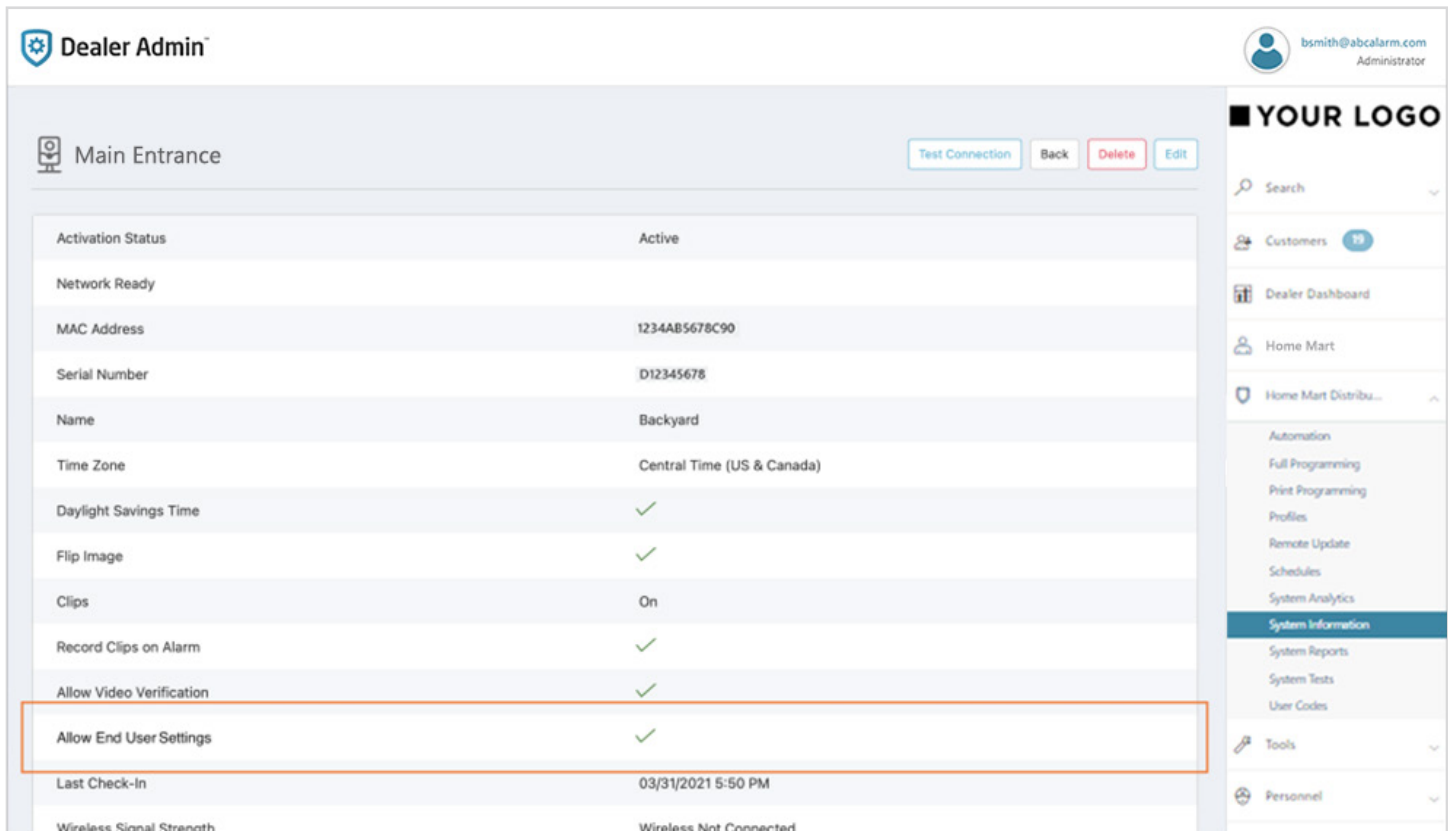

Dealer Admin Version 2.62.0	May 3rd, 2021
Tech APP (Android) Version 2.16.1	May 3rd, 2021
Tech APP (iOS) Version 2.16.1	May 4th, 2021
Virtual Keypad (Android) Version 6.36.0	April 29th, 2021
Virtual Keypad (iOS) Version 6.36.0	May 3rd, 2021
VirtualKeypad.com Version 2.32.0	May 3rd, 2021

Prevent End Users from Editing Video Settings

In Dealer Admin and Tech APP, you can now restrict the ability of end users to edit video settings from Virtual Keypad with the **Allow End User Settings** option.

This option enables you to individually restrict which cameras' settings can be edited. These camera settings include **Name**, **Record on motion**, **Record on alarm**, **Flip image**, and **Motion detection regions**.

By default, **Allow End User Settings** is enabled on all cameras. To see if this setting is enabled or disabled, open a system and select a camera. If it is enabled, a checkmark ✓ is displayed in the **Allow End User Settings**.

The screenshot shows the Dealer Admin interface for a camera named 'Main Entrance'. The interface includes a top navigation bar with the Dealer Admin logo and user information (bsmith@abcalarm.com, Administrator). A sidebar on the right contains a search bar and a list of navigation items: Customers (19), Dealer Dashboard, Home Mart, Home Mart Distribu..., Automation, Full Programming, Print Programming, Profiles, Remote Update, Schedules, System Analytics, System Information (highlighted), System Reports, System Tests, User Codes, Tools, and Personnel. The main content area displays the camera's settings in a table. The 'Allow End User Settings' option is highlighted with a red box and shows a green checkmark, indicating it is enabled. Other settings include Activation Status (Active), Network Ready, MAC Address (1234AB5678C90), Serial Number (D12345678), Name (Backyard), Time Zone (Central Time (US & Canada)), Daylight Savings Time (checked), Flip Image (checked), Clips (On), Record Clips on Alarm (checked), Allow Video Verification (checked), Last Check-In (03/31/2021 5:50 PM), and Wireless Signal Strength (Wireless Not Connected).

Setting	Value
Activation Status	Active
Network Ready	
MAC Address	1234AB5678C90
Serial Number	D12345678
Name	Backyard
Time Zone	Central Time (US & Canada)
Daylight Savings Time	✓
Flip Image	✓
Clips	On
Record Clips on Alarm	✓
Allow Video Verification	✓
Allow End User Settings	✓
Last Check-In	03/31/2021 5:50 PM
Wireless Signal Strength	Wireless Not Connected

Turn Off End User Settings

To edit camera settings:

1. Open the system.
2. Select the camera that you want to edit.
3. Press **Edit**.
4. Turn off **Allow End User Settings**.
5. Press **Save**.
