

FEATURE UPDATE | MAY 2021

Version 8.8.1 (5/11/21) Update

Effective May 17, 2021, all Entré Security & Access Management software will be manufactured as Version 8.8.1 (5/11/21).

Entré 8.8.1 works with panel firmware Versions 181 to 202.

Features

One Step Panel Deletion

If **Allow deletion of items that normally may only be disabled** is enabled in **System Configuration**, with this update, you can easily delete a panel by right-clicking the desired panel and selecting **Delete**. All the associated hardware, profiles, automation rules, etc. will be deleted. These items will need to be disabled or disassociated before the panel itself can be deleted. As before, the panel must be stopped prior to deletion.

Improvements

Improved CSV Import

Previously, the CSV Import tool would not import badges when using an automation rule. Entre 8.8.1 (5/11/21) resolves that issue, and the CSV Import tool now imports badges using an automation rule.

Obtaining the New Software

Entré Security & Access Management software Version 8.8.1 is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.8.1 (5/11/21), please complete the [Pre-Upgrade Checklist \(LT-1782\)](#) before contacting the Software Support Team in DMP Technical Support at 888.436.7832.
